Information Technology, Programmer/Analyst  
Michigan Technological University, Houghton, Michigan

As a member of the Enterprise Application Services team, within Information Technology, the position will assume a meaningful role in supporting the Oracle-based Ellucian Banner system and other administrative applications running on multiple hardware and software platforms. You will work closely with clients and peers to apply systems analysis and design techniques to analyze and evaluate business and/or educational needs. You will become part of a culture that empowers employees, treats them with respect, and encourages innovation and open communication.
